SUMMARY

RHCSA and CLA certified Linux professional with hands-on experience in Linux system administration, Docker, AWS, CI/CD, Terraform, and cloud infrastructure. Experienced in configuring, deploying, securing, monitoring, and troubleshooting Linux-based infrastructure. Seeking Linux Administrator, DevOps, or Cloud Support roles.

TECHNICAL SKILLS

Linux Administration: RHEL, Rocky Linux, Ubuntu, openSUSE, User & Group Management, Permissions, ACLs, LVM, File Systems, NFS, Autofs, iSCSI, Systemd, SELinux, Logs, Process Management, Troubleshooting
Networking & Security: IPv4/IPv6, SSH, SCP, Rsync, FirewallD, FTP/vsftpd, Samba, LDAP, SSL/HTTPS, CIS Benchmarks
Cloud (AWS / GCP): EC2, S3, EBS, VPC, IAM, Security Groups, Route 53, CloudWatch, Lambda, ALB, ASG, EKS, GCP
Infrastructure as Code: Terraform, Terraform Modules, State Management, AWS/Azure/GCP
Containers & Orchestration: Docker, Docker Compose, Podman, Kubernetes, OpenShift, Docker Swarm, Containerfile, Docker Volumes, Docker Networking
CI/CD: Jenkins, GitHub Actions, GitLab CI/CD/Runners, CI/CD Pipelines
Scripting & Automation: Bash, Shell Scripting
Monitoring: Nagios, Prometheus, Grafana
Version Control: Git, GitHub
Databases & Web: MySQL, PostgreSQL, HTML, CSS, Python (Basics), Java (Basics)

EXPERIENCE

Global IT Providers (GIP)	Jan 2026 – Present
<i>Technical Support Intern</i>	<i>On-site</i>
- Configured and administered Linux servers (Ubuntu, openSUSE) covering user/group management, permissions, LVM, NFS, iSCSI, Samba, and LDAP-based authentication. - Deployed and secured services including Apache, SSL/HTTPS, MySQL, and WordPress, with SSH key-based passwordless access across systems. - Built and deployed Docker images with persistent volumes and custom networking; set up a Jenkins CI/CD server integrated with Docker. - Automated system diagnostics via Bash scripting, applied CIS benchmark security recommendations, and monitored infrastructure using Nagios.	

PROJECTS

Secure Multi-Tier Web Application with Monitoring Docker, Nginx, Node.js, MongoDB, Prometheus, Grafana	
- Built a secure 3-tier containerized application with isolated Docker bridge networks across frontend, backend, database, and monitoring tiers. - Integrated Prometheus and Grafana for real-time metrics collection and visualization.	
Automated Docker Build & Deployment Pipeline GitHub Actions, Docker, Docker Hub	
Automated Docker image build, test, and Docker Hub push via a GitHub Actions CI/CD pipeline, using GitHub Secrets for secure authentication.	
High-Availability WordPress Infrastructure Terraform, AWS (VPC, EC2, ALB, ASG, RDS, EFS)	
Provisioned a Multi-AZ WordPress architecture on AWS using Terraform, including VPC, NAT Gateways, ALB, ASG, private EC2 instances, EFS, and RDS MySQL.	
5-Tier Microservices Voting Application Docker Compose, Flask, .NET Core, Redis, PostgreSQL	
Orchestrated a 5-tier microservices architecture with Docker Compose, integrating Redis and PostgreSQL, deployed on AWS EC2.	

EDUCATION

CSMSS Chh. Shahu College of Engineering, Chh. Sambhajinagar	CGPA: 8.30/10
<i>B.Tech in Computer Science & Engineering</i>	2023 – 2026
Government Polytechnic College, Jalna	82.96%
<i>Diploma in Computer Engineering</i>	2020 – 2023
Shri Balaji High School, Chh. Sambhajinagar	91.40%
<i>Secondary School Certificate (SSC)</i>	2019 – 2020

CERTIFICATIONS

Red Hat Certified System Administrator (RHCSA), EX200 – Cert ID: 260-006-648
Certified Linux Administrator (CLA), LX101 – Cert ID: 5TDF5XUS741
